

CLAIMS

What is claimed is:

1. A hand tool comprising:
a handle defining a first axis; and
a seat block mounted to said handle, said seat block comprising a slot which defines a second axis, said second axis offset from said first axis.
2. The hand tool as recited in claim 1, wherein said slot comprises a frusto-conical slot.
3. The hand tool as recited in claim 1, wherein said slot comprises a relatively larger semi-circular opening opposite a relatively smaller semi-circular opening.
4. The hand tool as recited in claim 1, wherein said seat block is threaded to said handle.
5. The hand tool as recited in claim 1, wherein said handle defines an enlarged segment opposites said seat block.
6. A method of increasing leverage on a handle comprising the steps of:
 - (1) engaging a tool with a slot upon the handle;
 - (2) sliding the tool toward an end of the handle; and
 - (3) exerting force to the handle through the tool.
7. A method as recited in claim 15, wherein step (1) further comprises:
engaging a frusto-conical slot in the tool with the handle.
